United States Patent and Trademark Office

KATEK

Reg. No. 7,431,129

Registered Jul. 02, 2024

Corrected Oct. 22, 2024

Int. Cl.: 9, 40, 42

Service Mark

Trademark

Principal Register

KATEK SE (GERMANY SOCIETAS EUROPÆE (SE))

Promenadeplatz 12

80333 München

GERMANY

CLASS 9: Electric and electronic connectors; electric and electronic circuits; electric and electronic assemblies for electronic controllers for use with chargers for batteries; electric and electronic assemblies for electronic controllers for use with household electrical appliances; semiconductors; power semiconductors; circuit boards; switches, electric; relays, electric; electric sensors; touchscreen sensors; infrared sensors; timing sensors; motion sensors; automatic solar tracking sensors; motion recognizing sensors; sensors for determining temperature; optical sensors; amplifiers; integrated circuits; scientific, research, navigation, surveying, photographic, cinematographic, audiovisual, optical, weighing, [measuring,] signaling, detecting, testing, inspecting, life-saving and teaching apparatus and instruments, namely, voltmeters, ammeters, electric power meters for metering and monitoring electric power consumption; weighing apparatus and instruments; apparatus and instruments for conducting, switching, transforming, accumulating, regulating or controlling the distribution of electricity, in particular chargers for batteries, inverters, power inverters, inverters for power supply, photovoltaic inverters, rectifiers, current rectifiers, power switches, light switches, electric switches, electric transformers, electric voltage transformers, electric cables, resistors for distributing or controlling electric current and electrical gang boxes; apparatus for recording, transmission or reproduction of sound or images; digital recording media, namely, pre-recorded DVDs, downloadable audio and video recordings, and CDs featuring and promoting electronic and electric products and circuits and manufacturing services for electronic and electric products and circuits; calculating machines; data processing equipment; computers; downloadable computer software for designing electronic equipment; recorded computer software for designing electronic equipment; downloadable computer software for monitoring charging cycles for batteries; recorded computer software for monitoring charging cycles for batteries; printed circuits; printed circuit boards; switchboxes for electricity; cases specially adapted for electrical equipment, namely, housings for electrical power supplies, housings for electric and electronic devices, and housings for electric and electronic assemblies; computer housings being computer cases; casings specially adapted for electrical equipment, namely, housings for integrated circuits, for electrical connectors, for printed circuit boards; cases specially adapted for distance measuring apparatus, for electrical signaling attenuators, for electrical continuity test apparatus for electrical circuits, for electrical switching apparatus, for electrical communications apparatus being electrical controlling devices, for electrical telecommunications apparatus being electrical radio connectors, for electrical controllers, for electrical power controllers, for electrical access remote controls, for electrical and electronic apparatus for processing data, for electrical and electronic apparatus for storing data being computer hardware,

Katherine Kelly Vidal

Director of the United States
Patent and Trademark Office

for data processing equipment and for electrical and electronic instruments for the transmission of data; network cabling being cable modems; interfaces for computers; electronic downloadable publications, namely, instruction manuals featuring electronic product descriptions and electronic instruction manuals for electric and electronic products and assemblies as well as for software * ; none of the above goods in relation with leak detectors and/or batteries of leak detectors *

CLASS 40: Custom manufacturing of electric and electronic products, electric and electronic assemblies and devices as well as integrated circuits for third parties, namely, electronics manufacturing services; custom manufacturing of electric and electronic products, electric and electronic assemblies, electronic circuit boards and electronic prototypes for third parties; soldering and desoldering of electronic devices; machining parts for others; equipping, namely, soldering of circuit boards; equipping, namely, soldering of printed circuit boards by means of SMD mounting technology, SMT mounting technology and Through-Hole Technology; electrophoretic coating of devices being treatment of materials; custom manufacturing of electronic circuits; galvanizing

CLASS 42: Scientific and technological services, namely, research and design in the field of electronic circuits, integrated circuits and the manufacturing thereof; industrial research in the field of electrical and electronic devices and circuits; design and development of computer hardware and software; design of machines for the manufacture and assembly of electronic circuits; development of new electric and electronic products and assemblies; design of electric and electronic systems; engineering services relating to the design of electric and electronic systems, products and assemblies; design and development of computer software, in particular design and development of computer software for the design, testing and analysis of electronic systems; development of computer software for computer-aided design and computer-aided manufacturing [CAD/CAM]; providing development services, namely, design services for electronic and electric products for third parties; electronic component testing; technical research relating to computer-aided programming for the production of electronic cards; quality control of electric, electronic and mechanical devices and electric and electronic assemblies and software for others; computer programming relating to electronic products and electronic circuit boards for third parties; development of technology solutions for the purpose of testing of electronic components and electronic systems and development of testing apparatus for the quality control of electric and electronic products and assemblies * ; excluding development of technological testing concepts, testing programs and testing apparatus for the quality control of leak detectors and batteries for leak detectors; none of the above services related to the design and development of leak detectors or batteries of leak detectors *

THE MARK CONSISTS OF STANDARD CHARACTERS WITHOUT CLAIM TO ANY PARTICULAR FONT STYLE, SIZE OR COLOR

OWNER OF INTERNATIONAL REGISTRATION 1733083 DATED 02-13-2023, EXPIRES 02-13-2033

SER. NO. 79-371,080, FILED 02-13-2023

REQUIREMENTS TO MAINTAIN YOUR FEDERAL TRADEMARK REGISTRATION

WARNING: YOUR REGISTRATION WILL BE CANCELLED IF YOU DO NOT FILE THE DOCUMENTS BELOW DURING THE SPECIFIED TIME PERIODS.

Requirements in the First Ten Years*

What and When to File:

- **First Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) between the 5th and 6th years after the registration date. See 15 U.S.C. §§1058, 1141k. If the declaration is accepted, the registration will continue in force for the remainder of the ten-year period, calculated from the registration date, unless cancelled by an order of the Commissioner for Trademarks or a federal court.
- **Second Filing Deadline:** You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between the 9th and 10th years after the registration date.* See 15 U.S.C. §1059.

Requirements in Successive Ten-Year Periods*

What and When to File:

- You must file a Declaration of Use (or Excusable Nonuse) and an Application for Renewal between every 9th and 10th-year period, calculated from the registration date.*

Grace Period Filings*

The above documents will be accepted as timely if filed within six months after the deadlines listed above with the payment of an additional fee.

***ATTENTION MADRID PROTOCOL REGISTRANTS:** The holder of an international registration with an extension of protection to the United States under the Madrid Protocol must timely file the Declarations of Use (or Excusable Nonuse) referenced above directly with the United States Patent and Trademark Office (USPTO). The time periods for filing are based on the U.S. registration date (not the international registration date). The deadlines and grace periods for the Declarations of Use (or Excusable Nonuse) are identical to those for nationally issued registrations. See 15 U.S.C. §§1058, 1141k. However, owners of international registrations do not file renewal applications at the USPTO. Instead, the holder must file a renewal of the underlying international registration at the International Bureau of the World Intellectual Property Organization, under Article 7 of the Madrid Protocol, before the expiration of each ten-year term of protection, calculated from the date of the international registration. See 15 U.S.C. §1141j. For more information and renewal forms for the international registration, see <http://www.wipo.int/madrid/en/>.

NOTE: Fees and requirements for maintaining registrations are subject to change. Please check the USPTO website for further information. With the exception of renewal applications for registered extensions of protection, you can file the registration maintenance documents referenced above online at <http://www.uspto.gov>.

NOTE: A courtesy e-mail reminder of USPTO maintenance filing deadlines will be sent to trademark owners/holders who authorize e-mail communication and maintain a current e-mail address with the USPTO. To ensure that e-mail is authorized and your address is current, please use the Trademark Electronic Application System (TEAS) Correspondence Address and Change of Owner Address Forms available at <http://www.uspto.gov>.
